### DETAILED ACTION

1. Claims 1-10 are presented for examination. The examiner requests, in response to this office action, any reference(s) known to qualify as prior art under 35 U.S.C. sections 102 or 103 with respect to the instant claims. That is, any prior art similar to the instant claimed invention that could reasonably be used in a 102/103 rejection. This request does not require applicant to perform a search. This request may be fulfilled by asking the attorney(s) of record handling prosecution and the inventor(s)/assignee for references qualifying as prior. A simple statement that the query has been made and no prior art found is sufficient to fulfill the request.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1-10 are rejected under 35 U.S.C. § 102(e) as being clearly anticipated by O'Brien et al. (Pat. No. 6,038,639).

O'Brien teaches the claimed "virtual stored data management subsystem" as storage subsystem 100. The claimed "one or more hosts" corresponds to processors 101. The claimed "virtual data units" corresponds to data including the copy data file. The claimed "associated management information" including "first and second boundaries" corresponds to two duplicative pointers shown in figure 16B. The pointers/names point to instances in memory.
